

# Unicorn Webshop - Architecture Documentation

---

## Introduction and Goals

---

The Unicorn Webshop is a show offering various unicorn themed products. It's main goal is the support of unicorn-lovers by providing the latest and greatest gadgets.

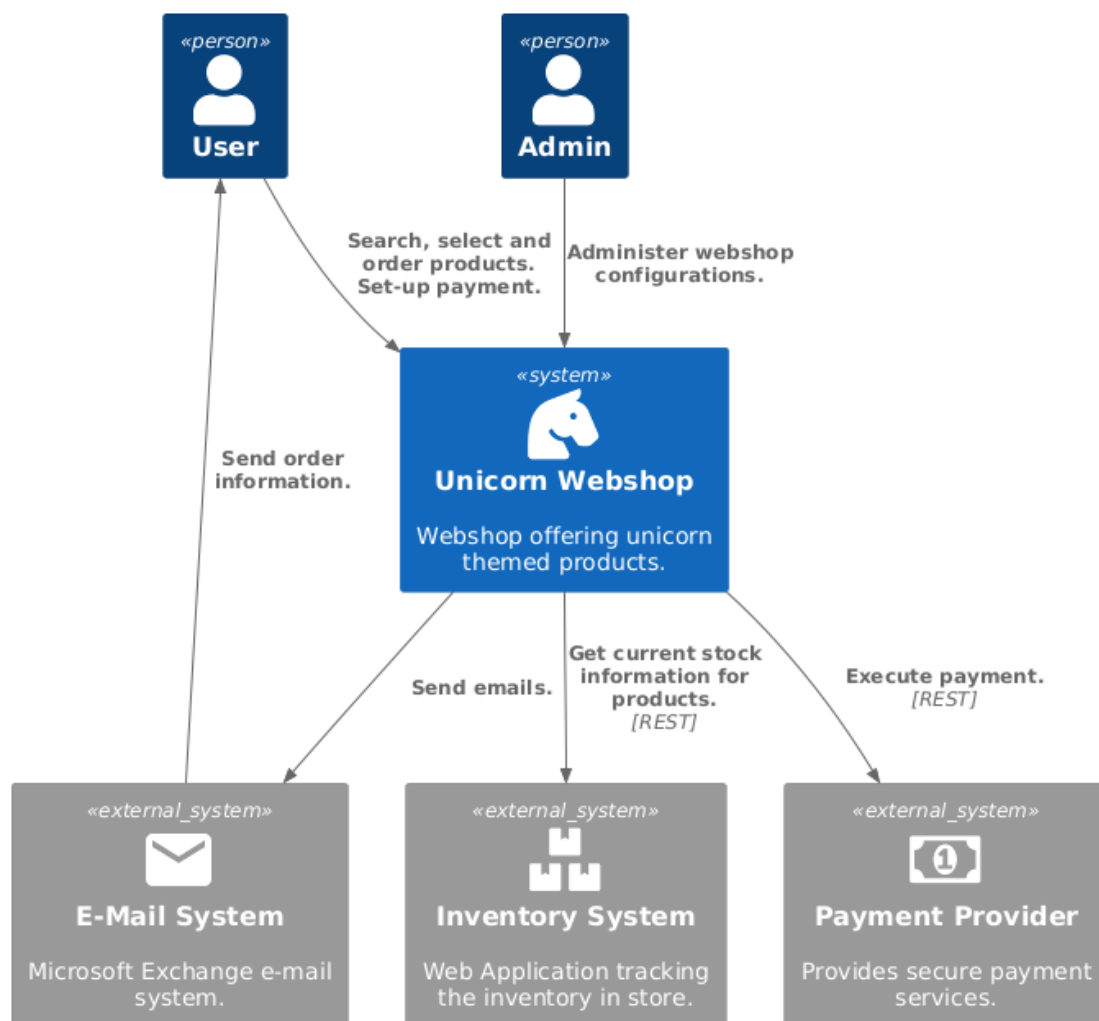

## Constraints

---

## Context & Scope

---

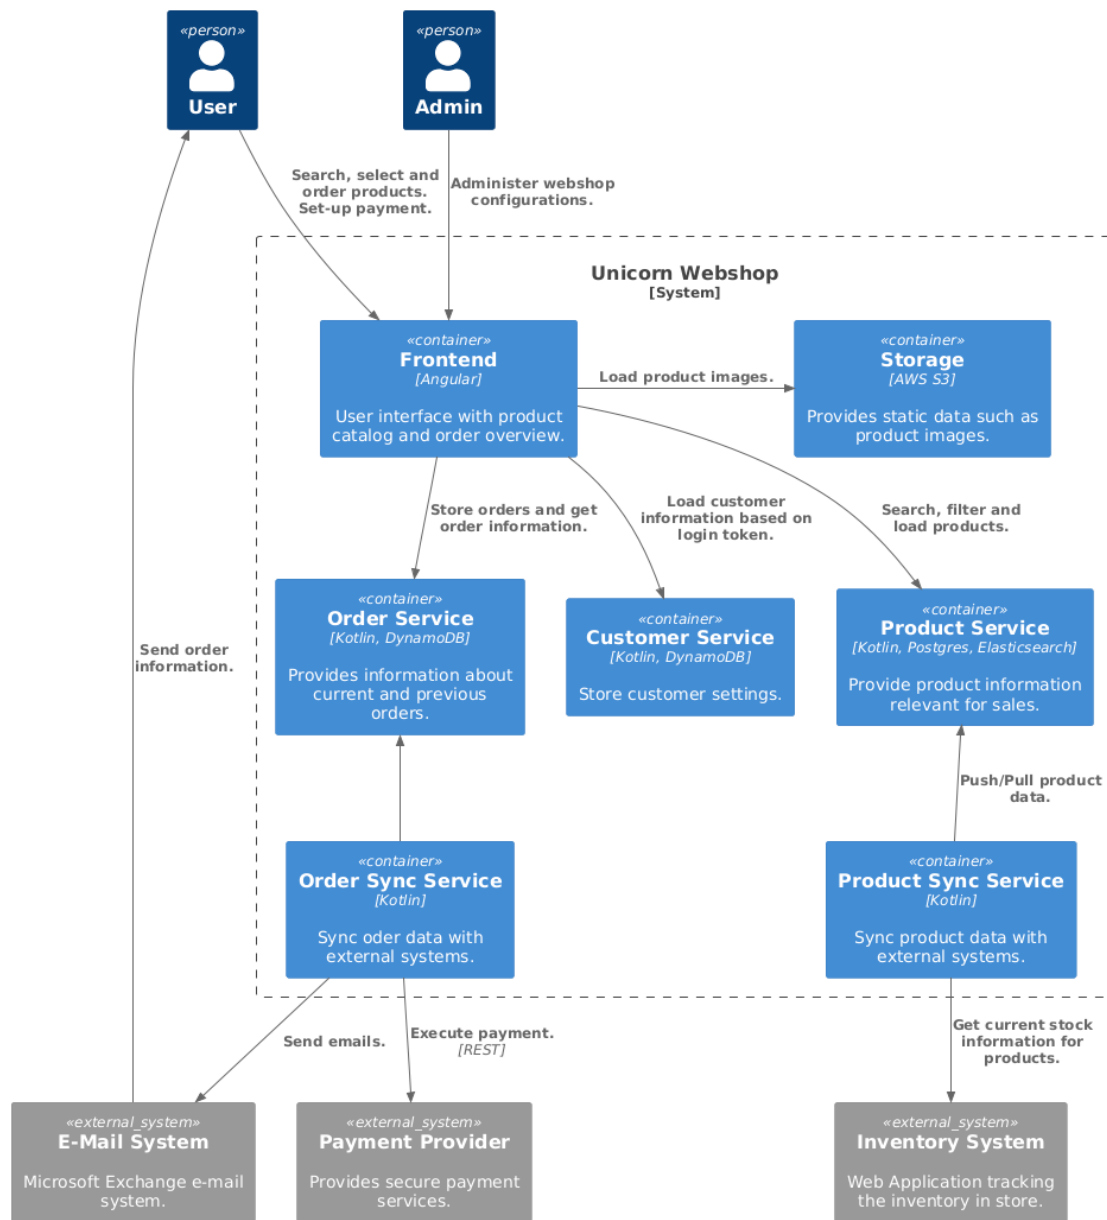

The Unicorn Webshop relies on external systems for services such as payment, inventory and sending of emails.

## Solution Strategy

---

The backend is implemented using microservices.
